

Green Meetings & Events

What makes a meeting green? The APEX/ASTM Environmentally Sustainable Meetings standards do.

PGA National Resort & Spa is the first hotel property in the United States to be third party certified to the Venue and Accommodations sector of this nine sector standard.

These are the first of its kind guidelines and requirements developed by the industry for the industry, including the US EPA, Convention Industry Council, the Green Meetings Industry Council and hundreds of industry professionals through a consensus process, vetted and published by ASTM International.

Requirements for this standard are in the following categories: Staff Management, Water Conservation, Energy Efficiency, Waste & Pollution Prevention, Air Quality, and Community Partnerships.

Additionally, PGA National Resort & Spa achieved the GEO OnCourse certification from the Golf and Environment organization, Scotland, for its famed Champion Course, home of the PGA Tour's Honda Classic. It also received the prestigious Sustainable Golf Course of the Year – 2016 for the Americas region from the International Association of Golf Tour Operators (IAGTO).

About ASTM

ASTM International is a globally recognized leader in the development and delivery of voluntary consensus standards. Today, over 12,000 ASTM standards are used around the world to improve product quality, enhance health and safety, strengthen market access and trade, and build consumer confidence.

About GEO

Golf and Environmental Organization (GEO) promotes and provides an assessment and certification track for sustainable best practices in golf. Sustainability comprises nature, business, and community. And golf is a business and sport, intrinsically tied to nature and community. Healthy recreation for all ages played amongst trees, grass, hills and dunes.
